

M&E+

High-Quality HVAC Installation Services

**Built on expertise. Driven by quality.
Delivered with integrity.**

At TBR M&E+, we specialise in delivering high-performance HVAC installations designed around the needs of our clients. Whether you're upgrading existing systems or installing new plant, our team ensures every project is carried out safely, efficiently, and to the highest professional standard.

We understand that no two buildings – and no two clients – are the same. That's why we take the time to listen, engage and understand your priorities from the outset. Our collaborative approach allows us to develop solutions that not only perform exceptionally but also offer long-term value and reliability.

What We Deliver

Heating, Ventilation & Air Conditioning Installations

CHW, LTHW and DX System Installations

Energy-Efficient System Upgrades & Retrofits

Full Plantroom Refurbishment & Replacement

Controls Integration & BMS Interfacing

Commissioning & Validation Services

Natural gas and renewable energy installations

Every installation is completed by qualified engineers with a commitment to quality workmanship, regulatory compliance and clear communication at every stage.

Your Project. Your Priorities. Our Expertise.

A Collaborative Approach

We believe the best results come from working closely with our clients. Our engineers and project managers engage directly with end-users, consultants, contractors and FM teams to ensure solutions are practical, future-proof and fully aligned with your operational needs.

Tailored HVAC Solutions

Every building has its own challenges—space constraints, occupancy patterns, energy targets and budget requirements.

TBR M&E focuses on designing and installing systems that strike the perfect balance between performance, efficiency and cost-effectiveness.

We provide:

Detailed surveys & technical assessments

Clear, honest advice on system options

Flexible solutions that fit your building and budget

Full transparency throughout the project life cycle

Safety & Compliance

We uphold the highest safety and compliance standards, working to all relevant regulations, manufacturer recommendations and industry best practices. Our processes ensure peace of mind and reliable long-term operation.

Our Commitment to Quality

Quality is at the core of everything we do. From detailed planning and equipment selection to installation and commissioning, we apply rigorous standards to ensure system performance, durability and efficiency.

We take pride in doing things right—first time, every time.

Why Choose TBR M&E?

Client-focused, solution-driven approach

High-quality engineering and installation

Proven experience across commercial, healthcare, education and industrial sectors

Reliable communication and project management

Commitment to efficiency, performance and sustainability

Let's Build the Right Solution Together

Whether you need a full HVAC installation, plant replacement or energy-efficient upgrade,

TBR M&E delivers a service built around trust, quality and technical excellence.
